01 — PROFILE

Geneva-based entrepreneur. I founded Heal ElectroniX in 2020 (electronics repair and micro-soldering), co-founded SBSA in 2021 (B2B textile and print customisation) and acquired the PEPE CHICKEN brand for Switzerland in 2025. Today I build AI and automation tools for small businesses with Neuron IA. Jobs in very different sectors, from watchmaking to the army and a hospital, taught me to understand a trade quickly and to talk to the people who do it.
